It's hard to think of anything less efficient than a paper-based system.
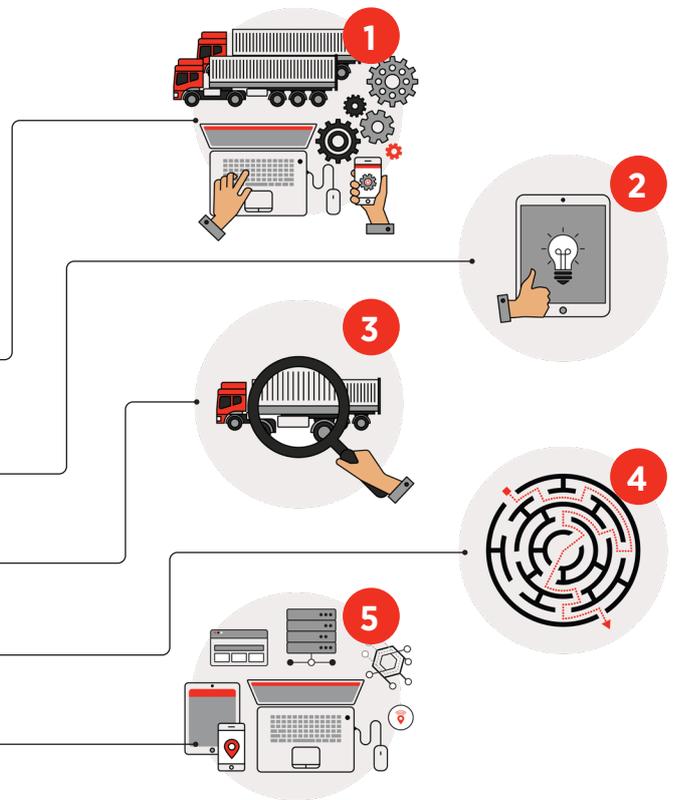

1 Vehicle inspection

2 Driver fills in a form on a clipboard

3 Marks down everything that the sheet asks

4 Driver delivers the form back to the vehicle depot

5 Information is either typed into a computer or simply put in a folder in a filing cabinet

6 But this kind of duplicative effort vanishes as soon as mobile devices replace paper

7 All this valuable information is automatically in a single centralised system. (on a computer)

Digital records that include photographs can make all the difference by reducing the time spent on maintaining workflows. Having the right information can help you to make smart decisions to boost the bottom line.

1 Mobile devices, create information that is easy to analyse

2 Turn into best practices

3 Allowing you to spot issues

4 Resolve problems

5 Create efficiencies in your business
