EROAD LAUNCHES FIRST MOBILE RUC APPLICATION

EROAD has developed an innovative mobile RUC application that allows clients to manage and purchase RUC for their vehicles using most web-enabled mobile devices. Mobile RUC has been specifically designed for mobile users to enable EROAD clients to experience easy navigation and an improved user experience. EROAD's mobile RUC application can be used on Android, iPhone and Blackberry phones and tablets.

EROAD's Commercial Manager, Peter Batcheler says "The smart phone is fast becoming an essential part of the transport industry. Mobile RUC means EROAD clients can manage their RUC, and enjoy operational visibility and enhanced control from virtually anywhere."

Mr Batcheler says "EROAD's end-to-end technology platform has been built with the most advanced tools available to ensure it is flexible and future proof. Our mobile RUC application is a further example of EROAD's commitment to our customers that they will never be left stranded with out-of-date technology."
