

EROAD Analyst PowerBI Integration

Use your fleet data to drive business insights

Have you realised the value and potential of your data? Are you leveraging all available information to make intelligent business decisions? If not, you could be leaving money and efficiency gains behind.

You've taken control of your fleet with EROAD. Take the next step and harness your fleet data to help your business perform even better. Get instant access to your fleet data easily and securely with EROAD Analyst. Utilising a pre-configured plug in for Microsoft® PowerBI®, you get an intuitive tool for creating graphical reports and visual data comparisons, delivering actionable insights. Quick, current and easy analytics support you and your team to manage and optimise your business.

CURRENT DATA AT YOUR FINGERTIPS

Access all your EROAD data through PowerBI. With the ability to include historical data up to six months old, you will have the most recent information available at your fingertips without having to make requests, or extract data manually from reports.

YOUR DATA. YOUR WAY

Use fleet data in combination with other important data sets from customer relationship management, payroll, project data or financials to gain further insights.

CLEAR VISUALIZATIONS. FAST INSIGHTS

Create clear, compelling reports about your fleet operations, helping your organisation make better and faster decisions on areas for improvement and key initiatives that are delivering results.

EROAD Analyst lets you create clear and compelling custom reports on your fleet and lets you combine EROAD data with other data from your organisation.

KEY FEATURES

- Pre-built and configured integration lets you pull EROAD data into PowerBI quickly and easily.
- Access six months of historical data on location, fuel, compliance and more.
- Simply connect EROAD to PowerBI and start generating reports and delivering insights.
- Easily refresh reports with updated data - no requests to EROAD and no no exporting data to spreadsheets.

WHAT EROAD ANALYST CAN DO FOR YOU

Use EROAD data to produce custom fleet and operations reports for internal stakeholders

- Produce your own dashboards to highlight and share the most important metrics to your business - speeding, logbook violations, idling, fuel usage, vehicle utilisation or more.
- Drill into and report on driver behaviour data to deliver a driver coaching experience tailored to your business.
- Create your own Proof of Service reports to provide to your clients, summarising time spent on worksites, vehicle locations, and activations of connected equipment.

Combine EROAD data with data from elsewhere in your business to deliver insights and make better business decisions

- Combine fuel, driver, and maintenance costs to report on cost/km at a fleet, group or vehicle level.
- Cross reference actual time spent driving/operating vehicles with data from your payroll systems to identify discrepancies which may indicate theft of time.
- Use EROAD data to give operational context to your financial data, such as understanding the profitability levels of individual routes, vehicles, and contracts.
