

# COMPLIANCE

## EROAD ELECTRONIC RUC

EROAD Electronic RUC (road user charges) solution allows you to buy your RUC when you need it, online 24/7 - no more paper licences and no vehicle downtime.

### Go electronic and never run out of RUC

EROAD's electronic solution revolutionises the way you manage and pay road user charges for trucks and light vehicles.

The EROAD system automatically records distance travelled and locations and calculates off-road distance travelled. You can buy RUC licences online, 24x7, using EROAD's secure, bank-grade payment gateway, and choose to automatically purchase RUC in legally minimum increments - virtually pay-as-you-go.

The system automatically sends the RUC licence information to the screen on your EROAD in-cab hardware for display as an approved electronic RUC licence - no paper labels required.

Our NZ Transport Agency-approved technology platform means you can safely ensure you do not overpay RUC and that you receive the RUC refunds you are entitled to. You will also have full visibility around RUC status and purchases for your entire fleet.

Don't waste any more of your time using an outdated paper based system when there is a better way - the EROAD way.

### KEY BENEFITS

**Improve cash flow** Buy RUC where and when you need it, in legally minimum increments, with reduced risk of penalties due to accidental non-compliance. Increased off-road refunds will deliver significant gains to your business.

**Save time** Eliminate time and money spent on RUC administration, and dispatching paper labels

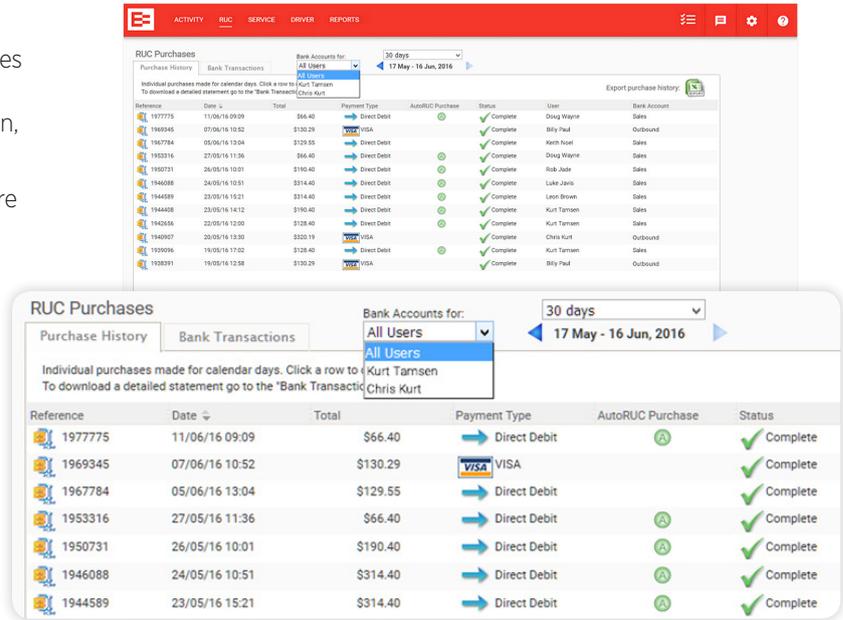

**Easy compliance** Automated system means you never run out of RUC, or have to take vehicles off the road to avoid non-compliance

The screenshot shows the EROAD web interface for RUC Licences. At the top, there are navigation tabs: ACTIVITY, RUC, SERVICE, DRIVER, and REPORTS. Below the tabs is a search bar and a dropdown menu for 'All Fleets'. The main content is a table with columns: Name, Rago, Distance reading, Type, Start Dist, End Dist, and Rem. The table lists various vehicles, with the 134-Todd vehicle highlighted in yellow. To the right of the table, there is a pop-up window showing details for the 134-Todd vehicle, including its current RUC status and a 'Purchase Distance Licence' button.

**KEY FEATURES**

- › EROAD’s in-vehicle hardware measures distance travelled with a high degree of accuracy, and also captures location, route and operational data
- › EROAD in-vehicle devices record, store and continuously transmit encrypted data to web-based application Depot, where users access information and services online
- › The RUC module displays and reports distance and location travelled by vehicles, displays RUC status of each vehicle, calculates off-road claims and generates supporting records
- › RUC reports are automatically generated ready for export
- › AutoRUC enables automatic RUC purchase when licence nears expiry
- › EROAD is a NZ Transport Agency-approved Industry Agent

"We've been with EROAD since the early days and find with the ease of off-road recovery the system pays for itself – it's so much easier, manageable and more cost efficient to buy it this way."

**Ian Emmerson, Managing Director**  
Emmerson Transport

**One end-to-end solution**

EROAD puts everything at your fingertips, saving you time and effort at every turn. You can rely on EROAD’s powerful set of tools to take control of your RUC compliance, health and safety, and fleet management, helping you efficiently utilise your capital and reduce the costs associated with fleet operations and management.

EROAD offers a complete suite of user-friendly compliance and telematics solutions, including driver safety tools and reports, vehicle maintenance, and fuel and fleet utilisation reporting. EROAD’s independently proven, secure platform guarantees accurate data that you can rely on to provide insight and competitive advantage.
