EROAD IDLE REPORTS

EROAD Idle Report improves fuel economy and reduces engine wear and tear by displaying average and total idle time by vehicle. The costs saved by monitoring idle events and tracking behaviour over time will deliver significant improvements to your bottom line.

Switch off and save

You can achieve major cost savings from operating vehicles more efficiently by managing idle times. Lower idle times save fuel and money, and reduce emissions, engine wear and maintenance costs.

EROAD's user-friendly tools and reports help you identify key trends, exceptions and unusual idle behaviour. With greater transparency and understanding, you can implement changes to drive better productivity across your fleet.

KEY BENEFITS

Reduce fuel and maintenance costs By minimising idling you can make significant savings on your fuel bill and the costs of engine wear and tear, to improve profitability

Lower emissions Minimise the environmental impact of damaging emissions, reduce noise and meet legal restrictions

Improve driving Identify vehicles and drivers with high rates of idling events for support with education programmes
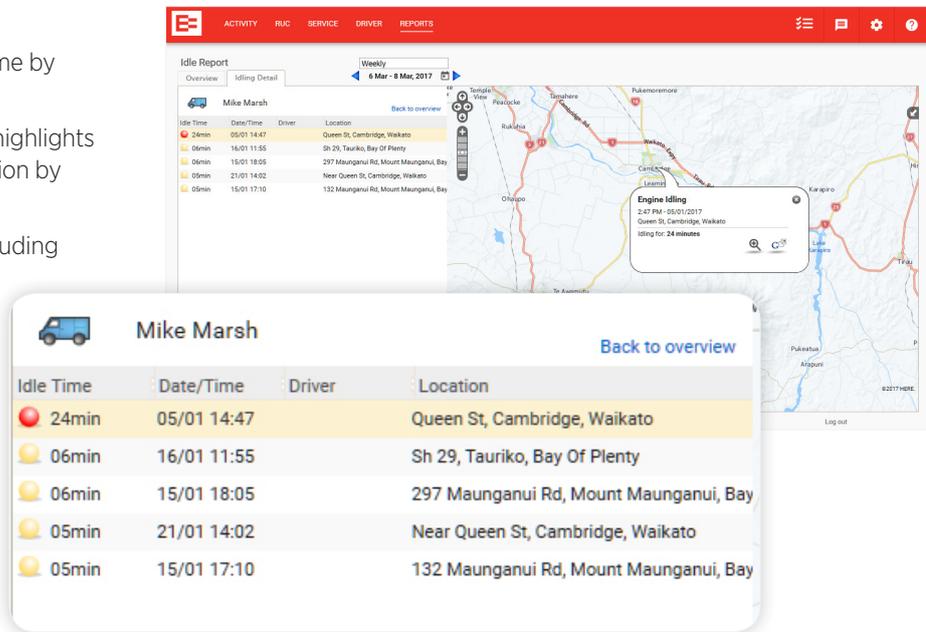

Increase productivity Drill down to understand specific idle events and identify the potential for interventions such as heaters, diesel-powered generators or accommodation policies to support drivers in safely reducing unproductive idling

KEY FEATURES

› Average and total idle time by vehicle

› Coloured bar chart that highlights frequency and idle duration by vehicle

› Details of idle events including location, date, time and idle duration

› Daily, monthly, quarterly and yearly reports for you to evaluate idle trends

› Export your reports to PDF and CSV formats
