

EROAD DRIVER SAFETY REPORT

EROAD Driver Safety Report provides an easy-to-read view of harsh braking and sharp acceleration events, supporting targeted feedback and greater understanding of risk areas.

Monitor driver behaviour to reduce risk

When drivers leave your yard, you want to be sure they are driving professionally, and protecting your company's reputation and the public. Harsh braking and sharp acceleration may indicate erratic or aggressive driving often linked to tailgating, or failing to scan the road ahead, which can lead to near misses or incidents and increase your liability.

Additionally, minimising braking and accelerating reduces fuel costs, and wear and tear on your vehicles.

EROAD Driver Safety Report provides an easy-to-read view of harsh braking and sharp acceleration events, supporting targeted feedback and greater understanding of risk areas.

The report makes it easy to identify high-risk drivers and provide targeted feedback by driver or vehicle. You can use the map view to raise awareness of locations where drivers need to take more care for use in safety training.

KEY BENEFITS

Protect your reputation Monitor driving behaviour to ensure professional driving across your fleet, to protect your company's brand as well as your drivers and the public

Encourage improvement An easy-to-read view of harsh braking and sharp acceleration that driver coaches, fleet managers and drivers can use to identify poor driving behaviour and improve driving over time. It makes it easy to identify driving behaviour that may indicate a need for targeted driver training

Minimise unnecessary costs Reduce the cost of collisions, rollovers, driving violations and insurance claims

Reduce fuel use Monitor 'heavy foot' on the pedal which increases fuel costs, and contributes to wear and tear on your company vehicles

Minimise risk Delivers feedback on risky driving behaviours in addition to speed, such as harsh braking and sharp acceleration – leading indicators of aggressive or inattentive driving

KEY FEATURES

- › EROAD Driver Safety Report provides fleet operators with a view of harsh braking and acceleration events, ranked from highest to lowest to support delivery of targeted feedback
- › Helps you quickly identify high risk drivers and provide targeted feedback per driver or vehicle
- › A map of risk areas with regular occurrence of harsh braking and acceleration shows drivers locations where they may need to take more care
- › Can be exported and scheduled to be delivered to your email inbox daily, weekly or monthly for easy monitoring of poor driving behaviour

One end-to-end solution

EROAD puts everything at your fingertips, saving you time and effort at every turn. You can rely on EROAD's powerful set of tools to take control of your RUC compliance, health and safety, and fleet management, helping you efficiently utilise your capital and reduce the costs associated with fleet operations and management.

EROAD offers a complete suite of user-friendly compliance and telematics solutions, including driver safety tools and reports, vehicle maintenance, and fuel and fleet utilisation reporting. EROAD's independently proven, secure platform guarantees accurate data that you can rely on to provide insight and competitive advantage.
