

EROAD RUC Star

Reporting

EROAD fleet tracking is fantastic but where we're increasingly seeing benefits is in reporting. It's even more important than real-time information because it's giving us a history of everything from mileage, event logs and RUC, to fuel efficiency and maintenance. With servicing, for example, it's starting to build a picture that helps us make decisions about vehicle replacement, based on factors like fuel economy and repair costs.

It's creating more and more information that's really beneficial to our fleet.
