

EROAD ★ RUC Star

No incidents

We've seen a 100% reduction in speed events since installing EROAD - and zero notifiable incidents.

We have daily toolbox meetings within each territory where we talk about safety and my message is always, "Keep an eye on EROAD. Make sure you're driving safely."

We installed the EROAD system to help us manage health and safety outcomes and improve fleet utilisation and it's already paid for itself with improvements in efficiency generated by the daily trip information and fuel savings.

Having a system in place to improve safety both for drivers and the public is good for all of us.
