

# EROAD RUC Star

*Connected*

The EROAD system's rock solid. It's provided our business with more accurate information and we know we can rely on it. We're now getting a whole raft of information we never had before, improving the management of our fleet and ultimately the service to our customers.

We've integrated the solution we developed for despatch and communications, including proof of delivery, sign-on glass and routing, with the EROAD system. EROAD's support has helped us in delivering a successful outcome to the business. We're now able to replace aging, in some cases paper-based systems, with a single EROAD connection plus tablets in each truck.
