

EROAD

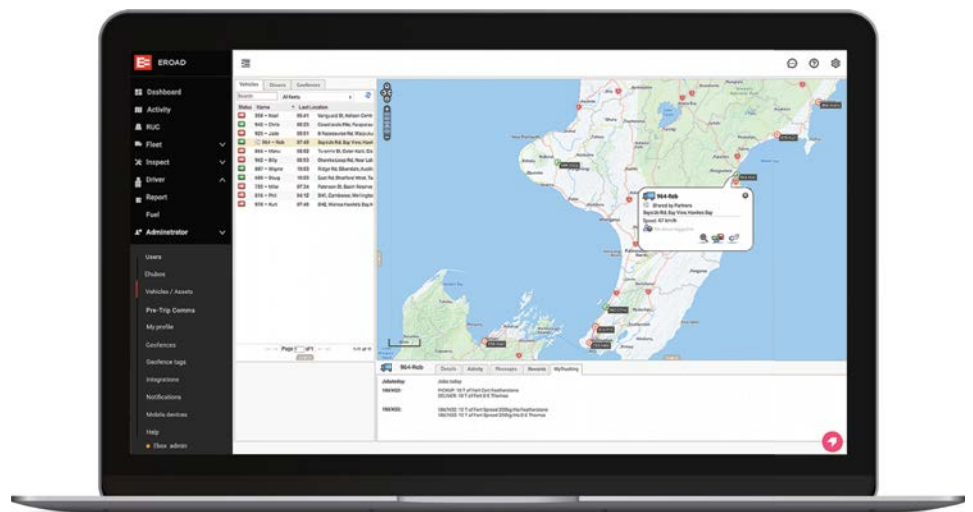

EROAD Share

Protect your valuable mobile assets

EROAD Share makes it easy to share vehicle and fleet information securely and easily with businesses in your supply chain, improving safety compliance and productivity.

When you work with contractors or other businesses in your supply chain, you don't always have the same visibility of their fleets as you have of your own. This can affect productivity and your ability to ensure the safety of all drivers working for you.

EROAD Share lets you share information easily, effectively and securely. It simplifies health and safety compliance by showing you not only the location of vehicles, but also how they are being driven. You control which vehicles are shared, for what period, and the driver behaviour reports they appear in.

MINIMISE RISK

Complete display of own and shared vehicle information on the same digital map helps minimise workplace risk

IMPROVE DESPATCH

Share live and historical daily activity history for your vehicle fleets to better manage despatch and provide proof of job completion

ENSURE SAFETY

Enable monitoring of driving behaviour by including shared vehicle data in Over Speed Dashboard, Leaderboard and Driver Insight reports

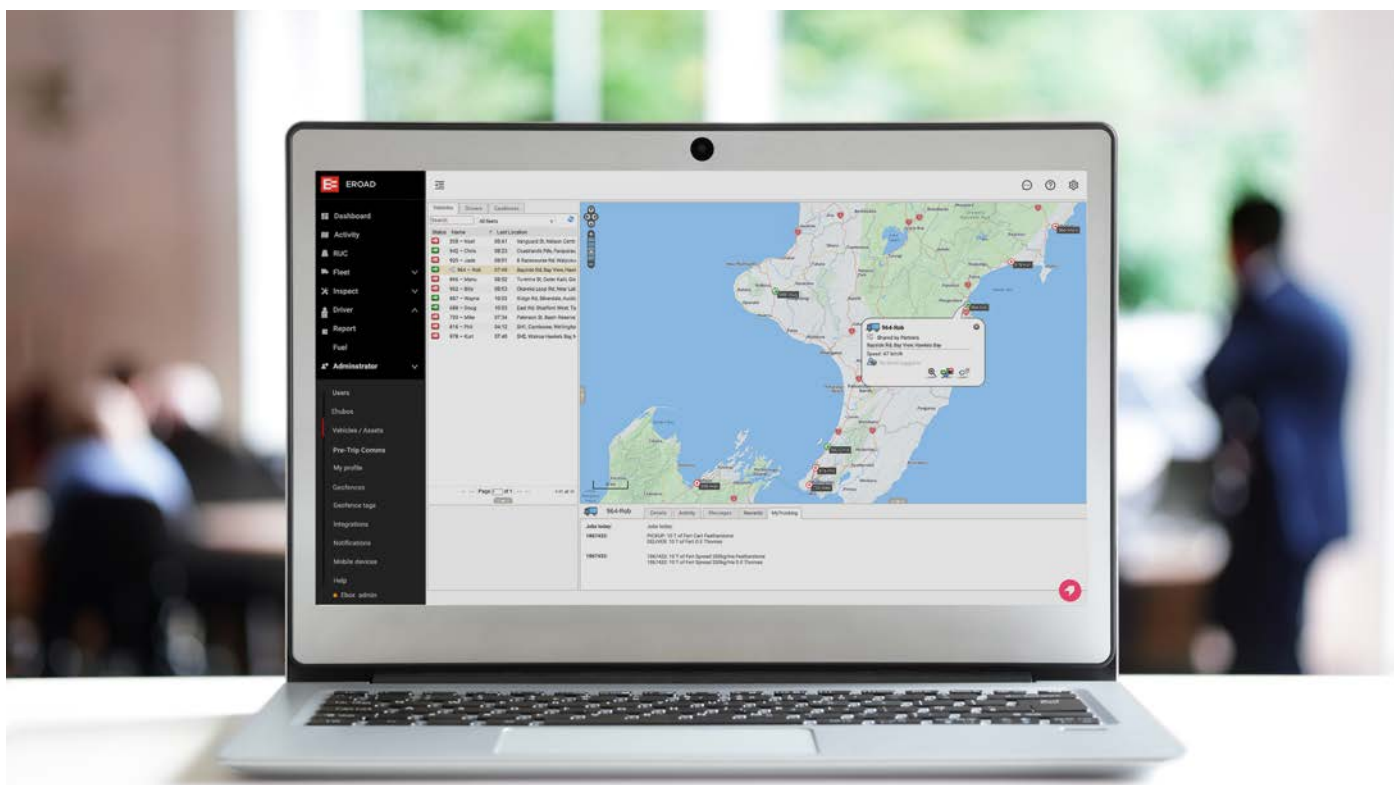

COORDINATE RESOURCES

Sub-contractor and contractor vehicles can be ranked against each other to improve fleet management

SIMPLIFY JOB MANAGEMENT

Move shared vehicles into your own fleet for enhanced job management

KEY FEATURES

Your business and those you work with can coordinate resources, and simplify dispatch and job management. Sharing of data and improved visibility of your operations helps you deliver high-quality service to your customers.

Visibility of your sub-contractors' vehicles means you can ensure the same high standards you expect from your own drivers, and better meet your duty of care obligations.

- ✓ Complete display of own and shared vehicle information on the same digital map helps minimise workplace risk
- ✓ Share live and historical daily activity history for your vehicle fleets to better manage despatch and provide proof of job completion
- ✓ Sub-contractor and contractor vehicles can be ranked against each other to improve fleet management
- ✓ Enable monitoring of driving behaviour by including shared vehicle data in Over Speed Dashboard, Leaderboard and Driver Insight reports
- ✓ Move shared vehicles into your own fleet for enhanced job management
- ✓ Third party data can be shared through the partner gateway share including refrigerated unit data or job status

About EROAD

EROAD develops technology solutions (products and services) that manage vehicle fleets, support regulatory compliance, improve driver safety and reduce the costs associated with driving. EROAD also provides valuable insights and data analytics to universities, government agencies and others who research, trial and evaluate future transport networks. This data enables those who use the roads to influence the design, management and funding of future transport networks.
