EROAD

Need Answers?
Improve Performance.
EROAD Analyst

Get the Metrics That Matter

You've taken control of fleet operations with EROAD. Now you need a tool that can turn that data into improved business performance.

EROAD Analyst provides critical fleet-wide analytics to help you make informed, data-driven decisions for improved performance.

Remove Manual Processes

Say goodbye to time-consuming data gathering.

No Costly Integrations

Easy setup without complex APIs.

Stay Current

Access auto-refreshed and up-to-date metrics.

Historical Data

Query your full EROAD data history.

Enhanced Connectivity

Integrate fleet data with other systems.
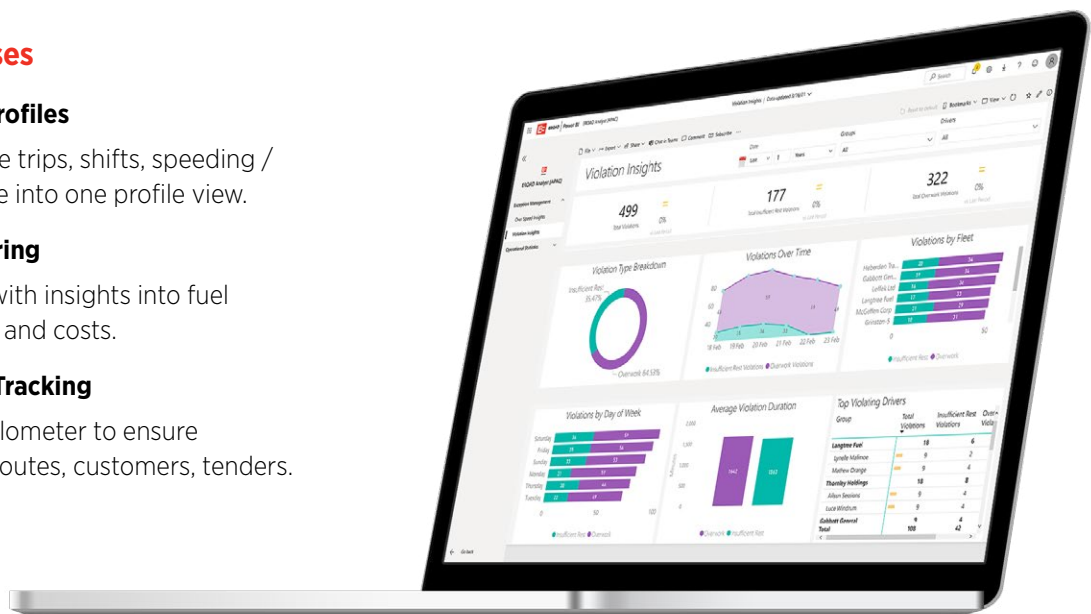

Example Use cases

Driver Behaviour Profiles

Combine metrics like trips, shifts, speeding / harsh events, fatigue into one profile view.

Fuel Usage Monitoring

Identify anomalies with insights into fuel transactions, usage, and costs.

Cost Performance Tracking

Measure cost-per-kilometer to ensure profitability across routes, customers, tenders.

EROAD Analyst lets you create clear and compelling custom reports on your fleet and lets you combine EROAD data with other data from your organisation.

Performance Insights

Gain instant visibility and comprehensive fleet insights across Safety, Operations, Compliance, Tax and Sustainability.

Safety

Monitor and improve safety compliance.

Efficiency

Identify operational inefficiencies.

Sustainability

Track trends and progress towards goals.

Compliance

Ensure adherence to regulatory policies.

Integration

Connect EROAD data with your preferred systems.

Designed for Strategic Decisions

While MyEROAD is tailored for real-time operational visibility, EROAD Analyst focuses on broader analysis to support strategic decisions. It's fully managed, quick to set up, and provides instant access to the data you need.

KEY FEATURES

Fast Time-to-Value	Quick setup with easy-to-use documentation, and all critical EROAD data in one place.
Custom Insights	Tailor dashboards to your business needs.
Expert Assistance	Work with EROAD's in-house data experts.
Comprehensive & Automated	Full historical and real-time data updates.
Wide Compability	Use common tools such as Excel, PowerBI, Tableau, or integrate with your data warehouse.

SPECIFICATIONS

- PowerBI dashboard template included

- 30+ data sets across Safety, Operations, Compliance, Tax and Sustainability

- Built on Snowflake, a secure, scalable and resilient data platform

- Detailed documentation

- Access to all current and historical data available

- Data refreshed at least every 4 hours, some datasets more frequently

EROAD Analyst is suitable for a data analyst who is familiar with the basics of the SQL query language, and/or can use tools such as Power BI, Tableau etc.

If you lack these skills, there is plenty of online material and in-person training available to get you up to speed quickly.
