

EROAD

EROAD Clarity Edge **Multicam**

Help exonerate innocent drivers and protect your business with side, rear, blindspot and cargo camera options.

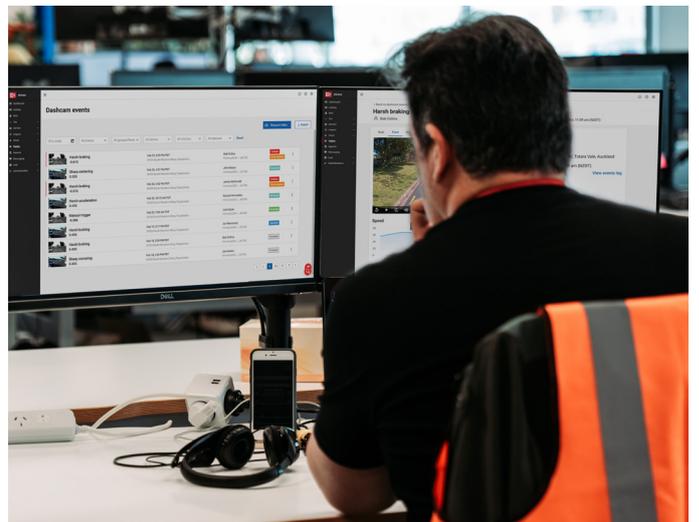

Clarity Edge Multicam offers enhanced protection, blind-spot coverage, and actionable safety insights - all from one simple platform. You can add up to three external cameras plus one driver-facing fatigue camera, alongside the in-cab display, giving you comprehensive visibility across your fleet and supporting faster incident reviews and targeted driver coaching.

A Flexible Solution For Safety-Focused Fleet Operators

EROAD's Clarity Edge Multicam offers a scalable, 360° camera system with industry-leading fatigue detection and fleet telematics on one platform, assisting fleets with:

- › **Accident Investigation:** Quickly retrieve multi-angle video footage to provide irrefutable evidence for insurance or legal claims, protecting not-at-fault drivers.
- › **Situational Awareness:** Provide drivers and managers with a 360° view around the vehicle to help reduce the risk of accidents caused by blind spots.
- › **Targeted Driver Coaching:** Use clear, objective video evidence of risky behaviours to deliver impactful training and help drivers build safer habits.
- › **Operational Visibility:** Monitor cargo, verify deliveries, and help protect assets from theft or damage with dedicated internal and external cameras.
- › **Safety and Compliance:** Manage your fleet cameras, AI safety events, GPS tracking, and regulatory compliance tools on a single, seamlessly integrated platform.
- › **Modular Setup:** See only the angles you need, with our completely modular solution.

Key Features

Feature	Functionality
Multi-Camera Expandability	Connect up to four cameras to the Clarity Edge AI dash cam – side, rear, cargo and fatigue. Includes an optional in-cab display for live blind spot or reversing views
Smart In-cab Display	Full-colour LED touchscreen displays live side, rear, and cargo camera views. Tap any feed for full screen. Enhances awareness when reversing, changing lanes, or manoeuvring in tight spaces. Optional integration with vehicle indicators automatically switches to side view with indicator use.
Automatic Clip Upload	Triggered clips automatically uploaded to Replay for easy footage retrieval.
Mosaic View in Replay	Get the full picture when reviewing footage with every camera angle shown side-by-side in Replay.
One Platform	A single web portal for GPS tracking, regulatory compliance, driver safety, and operational visibility.
Reliable Video Capture	Continuous loop recording on all cameras with secure local storage. Event-triggered clips are automatically uploaded to the cloud for rapid retrieval.
Enhanced Driver Coaching	Video events are automatically categorised and paired with telematics data for a simple coaching workflow.
Expanded on-board storage options	Dual SD card slot lets you record high-resolution footage for incident follow-up, plus up to 300 hours ² of backup at lower resolution. Choose your SD card capacity to match your storage and quality needs.

Hardware options

Clarity Edge Multicam requires the **Clarity Edge dash cam**. This completely modular solution can support up to four additional internal or external cameras, including side, rear, cargo, and fatigue-monitoring options to suit your fleet's needs:

Side rail camera
[IP68]: designed for side monitoring, fitted to rail

Side flush camera
[IP69K]: designed for side monitoring, fitted to vehicle side

Rear camera
[IP69K]: suitable for rear and internal cargo monitoring

Fatigue camera:
fitted in the cab for advanced driver fatigue monitoring

In-Cab Driver Display:
fitted in the cab for a live video feed of the external cameras to the driver.

Video Expander Box:
Required for systems with two or more additional cameras.

¹ Fatigue detection camera is an available add-on

² Actual footage storage time varies based on SD card size and number of cameras
